

Lamar County School District Vape Detector Bid Specifications

Bid will need to include cost per unit and installation. Vape detectors will be installed in middle and high school restrooms at multiple sites after hours. Units will need to be no larger than a household size smoke detector. Preferred mounting is a ceiling flush mount and is able to operate in up to 90% humidity. Units will need to perform air quality monitoring, chemical detection, room occupancy, sound frequency monitoring, and alerting capabilities. The total count and location can be found in the table below.

School	Main Buildings	Football	Baseball	Softball	Gym	Other	Total
